30 July 2024

One of the children in Akomanga 9 received a heart transplant last year.

He is attending school but is still immunosuppressed (has a weakened immune system) and his health is at risk if he catches any serious illness.

Please let office staff know if your child has any of the following:

- Gastro (stomach) viruses - vomiting, diarrhoea etc
- Influenza
- Covid
- RSV

Any other odd notifiable infections like:

- Meningitis
- Scarlet fever
- Human parvovirus etc

We will contact the child's parents and they will decide if he will be kept at home to protect him from infection.

Ngā mihi nui,

B Cowie
